SCALE FOR PROJECT PISCINE PYTHON DJANGO (/PROJECTS/42CURSUS-PISCINE-PYTHON-DJANGO) / DAY 08 (/PROJECTS/42CURSUS-PISCINE-PYTHON-DJANGO-DAY-08)

You should evaluate 1 student in this team

Git repository

git@vogsphere.kzn.21-school.ru:vogsphere/intra-uuid-45ee18c2-c924-4da

Introduction

For the smooth running of this evaluation, please respect the following rules:

- Remain polite, kind, respectful and constructive whatever happens during this conversation. It's a matter of confidence between you and the 42 community.
- Highlight the potential problems you 've had with the work you're presented to the person or the group you're grading, and take the time to talk about and discuss those issues
- Accept the fact that the exam subject or required functions might lead to different interpretations. Listen to your discussion partner's perspective with an open mind (are they right or wrong ?) and grade them as fairly as possible.
- 42's teaching methods can make sense only if peer-evaluation is taken seriously.

Guidelines

- You must clone the repository as follows:

git clone ~/d08

If the location is taken already, it must be freed before the clone.

- You must only evaluate what you will find in the student's or group's GiT repository.
- Take the time to check that the GiT repository matches the student or group and the project.
- Double check that no malicious alias was used to mislead you and make you grade something different from the official repository content.
- If a script supposed to help evaluate the exam is supplied by either side, the other side will have to strictly check it to avoid nasty surprises.

- If the evaluating student has not yet taken this project, they will have to read the exam subject in its entirety before starting the evaluation.
- Use the flags available on this grading system to signal an empty or nonfuncional project, a norm flaw, cheating, etc. In that case, evaluation stops and final grade is 0 (or -42 if it's a cheating problem). However, if it's not a cheating problem, you are invited to keep talking about the work that has been done (or not done, as a matter of fact) in order to identify the issues that lead to this stalemate and avoid it next time.
- You must stop grading when one exercise is not correct, even if the other ones are.

Foreword

This section is dedicated to the evaluation start and the checking of prerequisites. It's not graded, but if something's wrong or a condition is not met, here or anytime during the evaluation, the grade is 0 and a flag can be ticked if necessary.

Observing the instructions

- The repo contains the evaluated student's or group's work.
- The evaluated student or group can explain their work anytime during the evaluation.
- General and specific instructions of the day will be observed during the

Python-Django D08 training

- If you find an error in an exercise, the whole exercise is incorrect. No half-measure, no "slight error". The work is either perfect, either not. - Display of the pages must be managed: no strange behaviour, no special character (no accent) the display would not manage, etc. We want clean, or beyond.

Exercise 00 A reusable application.

- IMPORTANT: The DEBUG variable is set on False in the repo.
- The project contains a requirements.txt along with its dependencies at its root. They can be installed in a virtualenv. Build and install the application containing the required functionalities.

Carry out the migrations and the collectstatic.

- Temporarily change the value of the DEBUG variable to True.
- The manage.py utilitary development server can be launched with error once it's been installed.
- Once the development server runs, you can access a homepage from the browser at the following address: "http://127.0.0.1:8000".
- There is a form with a field to submit an image and a field to give the image a title.

The exercise is incorrect if one of the re	quirements is not perfectly met.		
⊘ Yes		imesNo	
Exercise 01 Serve the project.			
- Set the DEBUG variable back to False same for the rest of the days.	e. This setting will remain for the		
- Start Nginx and the wsgi server you obackground.	chose. Each server must run in the		
- Both servers launch properly. You car the images don't appear, it's ok for this			
The exercise is incorrect if one of the re	quirements is not perfectly met.		
⊗ Yes		$ imes_{No}$	
Exercise 02 With " STATIC" files.			
- The background image and the other by Nginx.	STATIC files are correctly served		
The exercise is incorrect if one of the re	quirements is not perfectly met.		
⊗ Yes		$ imes_{No}$	
Exercise 03 With " MEDIA" files.			
- Images submitted by the visitor appea	ar as they are uploaded.		
The exercise is incorrect if one of the re	quirements is not perfectly met.		
⊗ Yes		$ imes_{No}$	
Exercise 04 In HTTPS.			
- Website is accessible in HTTPS.			
The exercise is incorrect if one of the re	quirements is not perfectly met.		
⊗ Yes		$ imes_{No}$
